## OBJECTIVE

Highly skilled Flutter Developer with expertise in UI development , backend development using Firebase, and web scraping with Python. Passionate about leveraging cutting-edge technology to create innovative and user-centric applications that drive enhanced user experiences.

## EXPERIENCE

### MedOnGo, Flutter Developer

Feb 2023- Present

As a key contributor to a groundbreaking health project, I played a pivotal role in developing and implementing an advanced digital service for enhanced patient registration. Utilizing cutting-edge technology, our team integrated a Face Detection Camera system into the registration process, revolutionizing the way patients were onboarded.

Throughout my tenure, I demonstrated exceptional proficiency in designing, optimizing, and maintaining more than 30 complex flowcharts for the purpose of efficiently fetching questions in our UI system. These flowcharts played a pivotal role in enhancing the user experience and streamlining the question retrieval process.

As a dedicated UI developer, I have excelled in crafting dynamic and visually appealing user interfaces for our app, with a primary focus on designing intuitive multi-tab interfaces. My expertise lies in implementing various plugins and widgets, allowing seamless integration of advanced functionalities to enhance the overall user experience.

In backend development, I effectively utilized Firebase and Cloud Firestore to implement robust authentication, data storage, and data retrieval functionalities in our application.

I possess extensive experience in various testing

## SKILLS

- 1 Flutter
- 2 Firebase
- 3 Python(basic)
- 4 Scraping
- 5 Manual Testing

## LANGUAGES

English , Hindi

methodologies, including manual testing, Test-Driven Development (TDD), and Behavior-Driven Development (BDD). My technical proficiency allows me to design comprehensive test cases that ensure the quality, functionality, and reliability of software products.

Web Scraping with Selenium and Python :-As a skilled developer,I effectively extract data from dynamic web pages and websites that require user interactions, delivering valuable information for diverse applications.

## EDUCATION

**THDC-IHET, Uttarakhnad — *B.tech***

2017-2021

**SVMIC SRIKOT Uttarakhand — Intermediate**

2016-2017

**GHSS Sec. sr. school , Uttarakhand — High School**

## Project Name — *Detail*

1 Login , Signup , Forgot password Authentication using Email Password in Firebase

2 Expense Manager app ( using cloud firestore and firebase)

3 Flutter project with functionalities ( Widgets , login , signup , Camera , flowchart , whatsapp UI , Registration form , Firebase , Firestore )

4 Animation Page for UI

5 Task Manager app

6 Login , Signup Page using clean architecture

7 Scrap sakshi.com newspaper

8 Scrap Youtube Channel
